RE: Grand River Foods - New Facility
Cambridge, ON

Dear Wayne:

On behalf of Ball Construction's Specialty Projects team, I would like to thank Arthur Electric for their assistance in the completion of Grand River Foods' new 29,000 Sq.Ft. food processing facility in Cambridge.

The \$4.7 million project (\$342,000. electrical scope) completed in 6 months on a tight '*Fast Track*' schedule to provide Grand River Foods with occupancy January '05, was only accomplished by the dedicated and professional team of Arthur Electric's, led by your superintendent, Fred Thomas.

The high demands of time, budget and quality, based on the design by Millennium Engineering, were all met through the close alliance of Arthur Electric and the Ball Construction team.

Working again with Arthur Electric was a pleasure and we certainly look forward to future opportunities to further enhance our relationships.

Yours truly
